

Metallic Nanostructures on Surfaces

Filesize: 4.13 MB

Reviews

Absolutely essential read through pdf. it was actually writtern extremely flawlessly and valuable. You will like how the writer publish this book.

METALLIC NANOSTRUCTURES ON SURFACES

To get **Metallic Nanostructures on Surfaces** PDF, remember to refer to the web link under and download the document or have accessibility to other information which are in conjunction with METALLIC NANOSTRUCTURES ON SURFACES book.

VDM Verlag Apr 2009, 2009. Taschenbuch. Book Condition: Neu. 220x150x9 mm. Neuware - Heterogeneous catalysis is crucial in many industrial processes. Particle size effects can influence the catalytic behavior significantly, and is a central question in catalytic research as to how this can be exploited to improve activity and selectivity of a supported catalyst. The formation and size distribution of those metallic clusters is driven by diffusion, coalescence and sintering phenomena. An innovative method for buffer mediated deposition of metal on surfaces is developed, which presents the opportunity to create, characterize and study those processes on supported model catalysts (nano-clusters). This method, ranked among the Scientific American 'Top 50' in 2004, is also used to form submicron range variable width conducting wires, using macroscopic scale laser patterning. This is a parallel 'writing' procedure, at the size of a laser beam. The technique is an attractive method for the deposition of periodic and more complex patterns of conducting wires at widths below the current limits. It is discussed as a potential alternative for standard photo-lithography, promising a cleaner, cost effective and more environmentally friendly procedure. 144 pp. Englisch.
