Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1899 Excerpt: .original, and are regarded by Fox and Baynes (Analyst, xii. 33) as probably oxyacids of the acrylic series. The glycerin, as determined by the permanganate process, apparently increases somewhat, but this effect is probably due to the formation of soluble products, which, like glycerol, yield oxalic acid by oxidation with permanganate. On saponification blown oils usually yield very dark soaps. The following figures, obtained by the analysis of blown oils, have been published by Fox and Baynes (foe. cit.): - -Fox (Oil and Col. Jour., 1887, 549) has also published the following figures, showing the change produced in oils by blowing air: --HIGHER FATTY ACIDS. Under the denomination of fatty acids, used in its widest sense, are included the whole series of homologous acids of which formic acid is the lowest member, together with the various homologous acids of the acrylic or oleic series, the peculiar acids obtained by the saponification of castor and drying oils, and many others. The lower acids of the formic, acetic, or stearic series have been fully considered in Volume I., page 485 et seq. The following tables give some particulars respecting such higher fatty acids as are of interest or importance as constituents of the fixed oils or fats. Some information as to the analytical characters of caprylic, pelargonic, and capric acids will be found in Volume I. Palmitic, stearic, and oleic acids are so important and of such frequent occurrence that they are described at length in subsequent sections. Further information...
