Createspace, United States, 2012. Paperback. Book Condition: New. 203 x 127 mm. Language: English . Brand New Book ***** Print on Demand *****.WHAT IS THE PRICE OF PROGRESS? What do a CEO and entrepreneur, a paleontologist and naturalist, physicists, engineers and special operations teams along with a water mine on Europa and Jupiter have in common? The answer is a goal to travel faster than light, colonize the stars and, most of all, survive among the dinosaurs. Cretaceous Station Series Not fantasy! Not Science Fiction but rather Extrapolated Science. Reality is always stranger than fiction. So why not firmly ground your fiction on the hard rock of science? These are the action packed stories of the 322 scientists, soldiers and their families who worked to take mankind to the stars but found they first had to travel to a strange and distant past. Each chapter cites references for current science and a discussion of fact versus speculation. You will be amazed at just how strange these creatures we call dinosaurs were. Mankind is on the threshold of establishing it s first colonies on other stars. One company, GraviDynamics, has led the way with first their discovery of near instantaneous communications and now a star drive. GraviDynamics has already launched a starship using it s proprietary interstellar drive pushing it to the Sun s nearest neighbor. This marks a major goal for the researchers but they still have one big problem. Contrary to the predictions of their models, their ships refuse to accelerate faster-than-light-speed (FTL) and colonization, even at the speed of light, would require hundreds of years to travel to the nearest human-friendly stars. However, the scientists think they have a solution. The researchers are convinced that the problem is in the design theory for their StarShip Drives and they...
