Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1986 Excerpt: . . . of 1. 7 percent and had their greatest 18. Since substantial quantities of steel are sold at negotiated prices, a transaction measure is used in this analysis for both domestic and imported steel. The measure is derived by using a weighted average of the prices of five products: bars, cold rolled steel, hot rolled steel, plates, and structures. These products accounted for approximately 45 percent of domestic steel production and more than 50 percent of imported steel during the period. The data for imports through 1976 and for domestic production through 1979 was taken from Crandall, U. S. Steel Industry in Recurrent Crisis, pp. 154-155, 164-165; data for subsequent years were derived by the Congressional Budget Office. The Gross National Product deflator is used to remove the effects of inflation. 19. James T. H. Tsao, Economic Effects of Export Restraints, United States International Trade Commission Publication 1256 (Washington, D. C. :...
