Brand New Book ***** Print on Demand *****.Alexander Romanovich Luria, one of the most influential psychologists of the twentieth century, is best known for his pioneering work on the development of language and thought, mental retardation, and the cortical organization of higher mental processes. Virtually unnoticed has been his major contribution to the understanding of cultural differences in thinking. In the early 1930s young Luria set out with a group of Russian psychologists for the steppes of central Asia. Their mission: to study the impact of the socialist revolution on an ancient Islamic cotton-growing culture and, no less, to establish guidelines for a viable Marxist psychology. Lev Vygotsky, Luria's great teacher and friend, was convinced that variations in the mental development of children must be understood as a process including historically determined cultural factors. Guided by this conviction, Luria and his colleagues studied perception, abstraction, reasoning, and imagination among several remote groups of Uzbeks and Kirghiz from cloistered illiterate women to slightly educated new friends of the central government. The original hypothesis was abundantly supported by the data: the very structure of...
